MCOMPENG 2SH4 Project – Statement of Contribution

Your Group Name   Mirsab + Mohammad

Your Name   Mohammad Hadi

Your Team Member's Name   Mirsab Arif

You must complete this statement of contribution without discussing it with your project partner, i.e., individually. Your statement should be concise (at most one-and-a-half page). It has three parts:

1. Tell us about your own contribution to the development of your COMPENG 2SH4 project. For example, you can tell us about which project iterations (as mentioned in the project manual) and C++ project classes that you worked on and completed. You can provide a concise answer either in paragraph form or through bullet points.

I was developer 1 so I worked on iteration 1b and 2b. So, the initial contribution to gamemechs for iteration 1 and then for iteration 2 I worked on the food generation process. The first one, so I implemented the foodGenerate() function and getFoodPos(). Moreover, for iteration 3 I worked on the first part, feature 1. Essentially, modifying the player class.

To add on, at first, I got mixed up between the roles, and also worked on part 1a (my partners role, but then I found out I messed up so I had to do part 1b)

2. Repeat Part 1 above but this time tell us about your project partner's contribution to the development of your COMPENG 2SH4 project.

    My partner was developer 2. So he worked on iteration 1a,2b and for part 3 he worked on features 2 and 3. He was really helpful and helped me out a lot as well.

3. Tell us about your experience in your first collaborated software development through this project – what was working and what wasn't. If you are a one-person team, tell us what you think may work better if you had a second collaborator working with you.

    It was a really good experience. And having 2 people made it really efficient. We essentially split up roles between the 2 of us and where one of us needed help, the other was there to check over the code and do some debugging.
